To whom it may concern

Subject: El-Mor Electric Installation and Services (1986) LTD

El-Mor has installed electrical works for Coca-Cola including high and low voltage facilities and communications in the project "Meuyan Sorek" logistic center.

The project was carried out with a high level of professionalism, according to the schedules, and was delivered to our complete satisfaction.
The volume of this project amounted to approximately 3M\$ and lasted 18 months.

Moreover, El-Mor is accompanying Coca-Cola with several more projects, and also provides electrical maintenance services on a regular basis.

Yours sincerely,

Yehuda Forte
